Brewing
your coffee
SINCE 1948

When coffee demand meets power

WITHOUT COMPROMISING QUALITY

When high coffee demand meets high standards, our bulk brewers are up to the challenge.

They are designed for venues that require large volumes of coffee quickly, these machines deliver persistent quality with every brew, guaranteeing rich flavour and perfect temperature in even the most demanding circumstances and environments.

B-SERIES

BULK BREWING
MADE EFFORTLESS.

B-COMPACT

SPACE EFFICIENT AND
POWER-PACKED PERFORMANCE.

PERCOLATOR

CLASSIC BREWING,
TIMELESS FLAVOR.

B - SERIES

Built for bulk

TRUSTED FOR TASTE

The B-Series defines power and accuracy in bulk brewing. It delivers rich, aromatic coffee in large quantities and most importantly without jeopardizing taste.

A reliable favourite for high-demand settings, built to perform cup after cup, day after day.

High in volume brewing

Serve up to 80 litres of coffee with ease

Smart and flawless operation

Digital display, timers, and ready signals for total control

Built for busy environments

Durable, secure, and ready for constant use

Whatever your business

This machine is ideal for peak moments, such as the interval in the theatre or the coffee supply in the hospital. Quickly and easily large quantities of coffee, brewed in convenient, moveable containers that enable you to serve coffee at any moment and at any place you want.

B - SERIES

Features & Benefits

Separate brewing
into containers

Brew directly into portable containers. It is ideal for serving multiple locations without interruption.

Digital control panel

Program your brews and monitor totals with ease. Moreover, the coffee-is-ready signal, built-in timer and optimum security provisions, are all within your touch.

Optional hot water tap

Quick access to hot water for tea. Everything from one reliable machine.

Durable stainless steel

Engineered for long-lasting use. Easy to clean and made to last in demanding environments.

Flexible brewing solutions for every high-demand moment

EXPLORE

The B-series, B HW-series, and B (HW) W-series offer powerful solutions for brewing large quantities of fresh filter coffee. Fast, reliable, and easy to use. With options for hot water service and wall-mounted models, these machines adapt seamlessly to any professional environment.

B - SERIES Round filter coffee

When you need to serve a large volume of fresh filter coffee quickly, Bravilor Bonamat's round filter machines are the perfect solution. The B-series offers four models with capacities of 5, 10, 20, and 40 litres, allowing you to brew exactly the amount you need. When you need it.

By default, the B-series consists of a column and two containers, but the machines are also available in single models with one container on the left or the right and a column. This allows for easy compilation of, for example, double or triple machines to make even larger quantities of coffee.

These machines feature controls for straightforward operation, and their robust stainless steel design reflects the high quality you expect from Bravilor.

Each machine includes a built-in timer, so brewing can start automatically. Even if you're not there. Your coffee will be hot and ready exactly when you want it.

B HW - SERIES With hot water tap

Do you also need hot water in addition to coffee? Then opt for the B HW-series. These machines have separate hot water taps for, for instance, very easily making tea. This series includes three types: 5, 10 and 20 litres.

There are several models that have been adapted to various situations. With these large machines safety is important. Built-in safety devices make sure that no coffee is brewed when there is no container below the outlet or when the outlet has not been placed above the container.

B (HW) W-SERIES Wall mounted models

Both series are also available in wall-mounted models, so you can make coffee at a central place and serve it locally.

The containers are easily moveable using one of the trolleys from our product range. We also deliver a broad range of stackable containers: double-walled and with, among other things, a gauge glass and a non-drip tap. Also available with a double tap, as insulated model and as tea container.

Models containers

Type	Contents	Description
VG	5, 10, 20 en 40 litres	Completely insulated
VHG	5, 10, 20 en 40 litres	Electrical heating
VHG T	5, 10, 20 en 40 litres	Electrical heating and thermostatically controlled. Especially for tea
VHG D	5, 10, 20 en 40 litres	Electrical heating and extra non-drip tap

B-SERIES MARINE Professional brewing at sea

Bravilor Bonamat's B-series Marine models brew high volumes of coffee reliably in tough maritime conditions. Their stainless-steel build, fixing kits, and container holders ensure stability on ships and offshore platforms. The B5 Marine makes up to 10 L per cycle with automatic refill, digital display, and descaling alerts.

For larger needs, the B10 Marine brews 20 L, while the B10 HW adds a hot-water tap for tea and other drinks. All models feature thermal containers, easy digital controls, and built-in safety for professional coffee service at sea.

B - SERIES

Accessories

Filter cups

These filters, designed for the B-series, ensure optimum coffee distribution and a rich, delicious aroma. Their unique shape and volume make them the ideal solution for finely ground coffee.

Tea filter

This filter you can use for the B-series. You can switch the container. This tea filter, for the B-series container, provides large quantities of tea.

Tip-up plate

Stainless steel wall mounting for container of the B-series. available for the 5 and 10 liters and 20 and 40 litres.

Trolley

The stainless steel 10S and 20S models feature two side panels, a rear panel, and four rotary wheels (two with brakes). A height-adjustable drip tray (up to 300 mm) ensures flexibility. Compatible with 500 x 500 mm dishwasher baskets (not included).

For it is the perfect cup
of coffee that gets us
up in the morning.

B - COMPACT

Serve excellent coffee

IN LARGE VOLUMES

The B-Compact is your solution when you need large volumes of coffee at any location. Pre-heat your reservoir and start brewing when an expected group of coffee consumers is arriving. The B-Compact can handle various grind sizes of coffee ground due to the programmable brew pulse.

Up to 10 liters

Max brew volume

Program your brew time

and brew temperature

Pre-heat the reservoir

and start brewing when needed

Small locations, big impact

This machine is perfect for smaller-scale locations such as football canteens, outdoor kiosks, or camps. It allows you to quickly and easily brew large quantities of coffee in a convenient, movable container. You are ready to serve coffee whenever and wherever needed.

To us, perfection is an everyday purpose, the premise to do what we do.

BRAVOR BONAMAT
